SPECIFICATIONS

Heavy Duty 100P Black Removable Posts are locked firmly into the ground spigot by a Padlock, the ground spigot has a top mounted hinged lid to completely cover the access hole over when the Post is not in use (ideal for locations where the general public & staff are passing by).

Supplied in good quality Black powder coating and stand 790 mm when in position.

The ground spigot is 200 mm deep and is fixed into the ground using a **dry** mix of cement, ideal for all types of applications including block paving, gravel, tarmac & concrete.

When the Post is not in use it would be stored away in a nearby building or vehicle boot, although a lot of customers will purchase a second ground spigot (Spigot can be purchased here) and have this fitted to the side of the access just to store the Post.

These Posts are often fitted with a single top mounted Chain Eyelets or a pair of Eyelets fitted on two side, ideal for use with Chain or Rope.

We can offer a No Parking, Reserved or Disabled Labels upon request (please <u>contact us</u> for advice).

Also available are reflectors for additional visibility for vehicles, white (001-2420), Orange (001-2430), Red (001-2440).

These posts are great value for money, they are strong & tall, easy to maintain, perfect for locations that could be prone to pedestrians or vehicles being at risk to objects left in the ground, or locations that were unfit for fully telescopic security posts due to underground services.
